

Google Classroom Explained

Google Classroom is accessible from any computer with internet access. Your child will sign in using his or her school email address and password.

In Elementary School, It is mostly used as of Grade 3, with first experiences during Grade 2.

In Middle School, it is the students' main platform and it is used daily.

In Google Classroom, teachers assign work to the students digitally, without paper. They can do it from school (or home, if they don't quite finish something). They can submit it to the teacher online, and can be returned to your student with comments, edits, suggestions, and/or grades.

Google Classroom allows for more feedback, and for teachers to know a lot more about exactly what each child accomplished each day.

In addition, teachers can setup reminders for the students of upcoming events/ projects. You can see those too. Be sure to accept the email invite to receive the email summaries of your child's progress.

How to connect

Students use their Marymount email and password to access google classroom. Alternatively, they can use their Clever QR-Code to sign-in on their school computer and switly access Google Classroom.
